SUMMARY

Full-stack software engineer with applied AI/ML experience, from research to production. Took an AI-powered hospitality platform from concept to launch as a founding engineer. Previously built and researched machine learning systems including a 98.5%-accuracy crop-disease classifier and an adapted Capsule Network architecture. ASU Barrett Honors graduate (Summa Cum Laude) with a track record of learning new stacks quickly and shipping.

EDUCATION

Barrett Honors College at Arizona State University

May. 2024

Bachelor of Science, Computer Science

Tempe, AZ

- **GPA: 3.6; Summa Cum Laude;** Dean's List; Engineering Projects in Community Service.
- Informatics Certificate; Barrett College Fellows Research Program; CodeDevils; ASU Overwatch eSports.

WORK EXPERIENCE

OViiE AI Inc.

Feb. 2026 – Present

Founding Full Stack Developer

Remote/Orlando, FL

- Founding engineer for STELLA, an AI-powered hospitality platform that integrates with hotel infrastructure to boost staff productivity and support multilingual guest communication.
- Took the product from concept to production, owning frontend UI/UX, backend/database, data handling, security, feature delivery, QA, and CI/CD.
- Built and shipped features across React, Node.js, Supabase, and AWS in a fast-moving startup environment.

Capsule Network Research with Dr. Lynn Carter

May. 2023 – May. 2024

Undergraduate AI Researcher

Tempe, AZ

- Implemented experimental machine learning network architecture, Capsule Network, using Python.
- Adapted architecture from “Dynamic Routing between Capsules” to generalize to a wider range of datasets.
- Researched mathematical and technological foundations of capsule theory and applied it to a real world problem

Astro Seed

Aug. 2023 – May. 2024

Machine Learning Engineer

Tempe, AZ

- Designed, implemented, and tested a deep convolutional neural network to identify health defects in crops.
- Achieved 98.5% classification accuracy for nutritional deficiencies and diseases.
- Won 2nd place out of 150 other products at a showcase event.

The Walt Disney Company

May 2025 – Present

Cast Member

Orlando, FL

- Minnie Van Service Ride Associate (Oct 2025 – Present): facilitate daily operations of a high-volume, premium transportation service across Disney property, achieving a record-high number of ride requests fulfilled in a single day.
- Trainer, Backlot Express (May 2025 – Oct 2025): trained new cast members to work safely and efficiently in a high-volume, fast-paced restaurant environment.

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** HTML and CSS Specialist, JavaScript Specialist, Intercultural Skills, Disney College Program.
- **Technologies:** React, TypeScript, Node.js, Supabase, AWS, SQL, Python, Java, TensorFlow, Keras, Tableau
- **Focus Areas:** AI/ML integration, LLM prompt engineering, full-stack web development, Data structures and algorithms
- **Interests:** Board Games; Guitar; Video Games; Film and Theater; Live Music; *Magic the Gathering*; *Lorcana*.
